## PROJECTS

### Food Ordering Website

- **Role:** Frontend Developer
- **Technology:** React.js, firebase,Tailwind
- **Description:**I developed this project for my own business.

### Sparlax

- **Role:** Frontend Developer
- **Technology:** React.js, Tailwind
- **Description:** I developed a modern and responsive spa website for a Dubai-based client, ensuring an elegant user interface with smooth navigation. Using React.js and Tailwind CSS, I focused on creating a visually appealing and user-friendly design. The website highlights the spa's services, promoting a luxurious and relaxing experience for users.
- **Challenges:** While developing the spa website, I faced challenges integrating the map system to accurately display the client's location. Ensuring responsiveness across various devices required meticulous adjustments and testing. Overcoming these obstacles enhanced my problem-solving skills and attention to detail in web development.

### Crafted Circle

- **Role:** Frontend Developer
- **Technology:**React.js, Tailwind!,daisyUI
- **Description:** I developed a social media website named "Crafted Circle" for an agency, focusing on creating an interactive and user-friendly interface. Using React.js and Tailwind CSS, I implemented features like user profiles, posts, and real-time updates. The project showcased my ability to design responsive layouts and deliver a seamless user experience working on it we are 8 team members

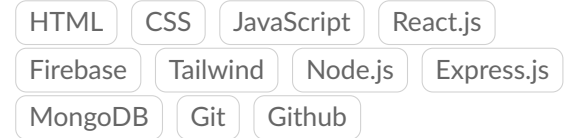

### Hotel Booking Website

- **Role:** Full Stack Developer
- **Technology:** React.js, tailwind!,Node.js,express.js, mongoDB.
- **Description:**I developed a full-stack hotel booking website named "Crafted Circle" as a personal project, focusing on delivering a smooth and responsive user experience. Leveraging React.js for the front-end and Node.js for the backend, I implemented features like room search, booking, and payment integration. This project enhanced my skills in full-stack development and end-to-end project management.

### School Management System

- **Role:**Frontend Developer
- **Technology:** React.js, Tailwind,
- **Description:** Developed a comprehensive School Management System with features such as student enrollment, attendance tracking, grade management, and teacher-student communication. Implemented secure authentication, optimized performance, and ensured reliability through rigorous testing.

## SKILLS

## EDUCATION

### SSC

#### Nasaratpur ML High School

2025 - Present

## WORKING AREA

- Frontend Development
- Website Development
- REST API Development
- REST API Implementation
- Application Architecture Design
